CONTENTS

Volume 17 Number 1 **January 2005**

Autonomic oil reservoir optimization on the Grid
V. Matossian, V. Bhat, M. Parashar, M. Peszyńska, M. K. Sen, P. Stoffa and M. F. Wheeler 1

A role for Pareto optimality in mining performance data
J. M. Malard 27

Solving the block–Toeplitz least-squares problem in parallel
P. Alonso, J. M. Badía and A. M. Vidal 49

Performance evaluation of the SX-6 vector architecture for scientific computations
L. Oliker, A. Canning, J. Carter, J. Shalf, D. Skinner, S. Ethier, R. Biswas, J. Djomehri and R. Van der Wijngaart 69

Volume 17 Number 2–4 **February–April 2005**

Special Issue
Grid Performance
Guest Editors: J. Gurd, T. Hey, J. Papay and G. Riley

Editorial 95

Automatic performance analysis tools for the Grid
M. Gerndt 99

Performance technology for parallel and distributed component software
A. D. Malony, S. Shende, N. Trebon, J. Ray, R. Armstrong, C. Rasmussen and M. Sottile 117

ASKALON: a tool set for cluster and Grid computing
T. Fahringer, A. Jugravu, S. Pllana, R. Prodan, C. Seragiotto Jr. and H.-L. Truong 143

Performance engineering in data Grids
E. Laure, H. Stockinger and K. Stockinger 171

Performance of a possible Grid message infrastructure
S. Pallickara, G. Fox, A. Uyar, H. Liu, X. Rao, D. Walker and B. Yildiz 193

Performance-based middleware for Grid computing
G. R. Nudd and S. A. Jarvis 215

Self adaptivity in Grid computing
S. S. Vadhiyar and J. J. Dongarra 235

Performance control of scientific coupled models in Grid environments
C. Armstrong, R. W. Ford, J. R. Gurd, M. Luján, K. R. Mayes and G. D. Riley 259

The role of performance engineering techniques in the context of the Grid
A. J. G. Hey, J. Papay and M. Surridge 297

Special Issue
Grids and Web Services for e-Science
Editors: T. Hey and G. Fox

Editorial 317

Distributed computing in practice: the Condor experience
D. Thain, T. Tannenbaum and M. Livny 323

The design and implementation of Grid database services in OGSA-DAI
M. Antonioletti, M. Atkinson, R. Baxter, A. Borley, N. P. Chue Hong, B. Collins, N. Hardman, A. C. Hume, A. Knox, M. Jackson, A. Krause, S. Laws, J. Magowan, N. W. Paton, D. Pearson, T. Sugden, P. Watson and M. Westhead 357

Web Service Grids: an evolutionary approach
M. Atkinson, D. DeRoure, A. Dunlop, G. Fox, P. Henderson, T. Hey, N. Paton, S. Newhouse, S. Parastatidis, A. Trefethen, P. Watson and J. Webber 377

WS-GAF: a framework for building Grid applications using Web Services
S. Parastatidis, J. Webber, P. Watson and T. Rischbeck 391

Volume 17 Numbers 5–6 April–May 2005

Special Issue
2002 ACM Java Grande–ISCOPE Conference Part I

Editorial
G. Fox 419

Adding tuples to Java: a study in lightweight data structures
C. van Reeuwijk and H. J. Sips 423

Object combining: a new aggressive optimization for object intensive programs
R. Veldema, C. J. H. Jacobs, R. F. H. Hofman and H. E. Bal 439

UMM: an operational memory model specification framework with integrated model checking capability
Y. Yang, G. Gopalakrishnan and G. Lindstrom 465

Elimination of Java array bounds checks in the presence of indirection
M. Luján, J. R. Gurd, T. L. Freeman and J. Miguel 489

Run-time evaluation of opportunities for object inlining in Java
O. Lhoták and L. Hendren 515

Jeeg: temporal constraints for the synchronization of concurrent objects
G. Milicia and V. Sassone 539

Compiling almost-whole Java programs
Z. Budimlić and K. Kennedy 573

Recurrence analysis for effective array prefetching in Java
B. Cahoon and K. S. McKinley 589

The Open Runtime Platform: a flexible high-performance managed runtime environment
M. Cierniak, M. Eng, N. Glew, B. Lewis and J. Stichnoth 617

Immutability specification and its applications
I. Pechtchanski and V. Sarkar 639

Experience in integrating Java with C# and .NET
J. Bishop, R. N. Horspool and B. Worrall 663

Ravenscar-Java: a high integrity profile for real-time Java
J. Kwon, A. Wellings and S. King 681

Improving the memory management performance of RTSJ
M. T. Higuera-Toledano and V. Issarny 715

Volume 17 Numbers 7–8 June–July 2005

Special Issue
2002 ACM Java Grande–ISCOPE Conference Part II

Features from functional programming for a C++ skeleton library
H. Kuchen and J. Striegnitz 739

A method-level comparison of the Java Grande and SPEC JVM98 benchmark suites
D. Gregg, J. Power and J. Waldron 757

JOPI: a Java object-passing interface
J. Al-Jaroodi, N. Mohamed, H. Jiang and D. Swanson 775

Advanced eager scheduling for Java-based adaptive parallel computing
M. O. Neary and P. Cappello 797

Implementation and performance of a particle-in-cell code written in Java
S. Markidis, G. Lapenta, W. B. VanderHeyden and Z. Budimlić 821

On the conditions necessary for removing abstraction penalties in OoLaLa
M. Luján, T. L. Freeman and J. R. Gurd 839

Collective communication for the HP Java programming language
S. B. Lim, B. Carpenter, G. Fox and H.-k. Lee 867

Using MPI with C# and the Common Language Infrastructure
J. Willcock, A. Lumsdaine and A. Robison 895

inAspect: interfacing Java and VSIPL applications
T. Alford, V. P. Shah, A. Skjellum, N. H. Younan and C. D. Taylor 919

Generic programming for high-performance scientific applications
L.-Q. Lee and A. Lumsdaine 941

Support and optimization of Java RMI over a Bluetooth environment
P.-C. Wei, C.-H. Chen, C.-W. Chen and J.-K. Lee 967

CSFS: a Java enabled network file storage system
H. Hua, D. Yafei and L. Xiaoming 991

JavaSymphony: a new programming paradigm to control and synchronize locality parallelism and load balancing for parallel and distributed computing
T. Fahringer and A. Jugravu 1005

Enterprise JavaBeans caching in clustered environments
A. Leff and J. T. Rayfield 1027

Object-oriented programming in peer-to-peer systems
P. Th. Eugster and S. Baehni 1053

Ibis: a flexible and efficient Java-based Grid programming environment
R. V. van Nieuwpoort, J. Maassen, G. Wrzesińska, R. F. H. Hofman, C. J. H. Jacobs, T. Kielmann and H. E. Bal 1079

Towards enabling peer-to-peer Grids
G. Fox, S. Pallickara and X. Rao 1109

Volume 17 Number 9 10 August 2005

Concurrent urban legends
P. A. Buhr and A. S. Harji 1133

Pipelines on heterogeneous systems: models and tools
F. Almeida, D. Gonzalez, L. M. Moreno and C. Rodriguez 1173

Distributed computing with Triana on the Grid
I. Taylor, I. Wang, M. Shields and S. Majithia 1197

Volume 17 Number 10 25 August 2005

Special Issue
The High Performance Architectural Challenge: Mass Market versus Proprietary Components?

Editorial
D. B. Nelson 1215

A performance comparison between the Earth Simulator and other terascale systems on a characteristic ASCI workload
D. J. Kerbyson, A. Hoisie and H. J. Wasserman 1219

Evaluating high-performance computers
J. S. Vetter, B. R. de Supinski, L. Kissel, J. May and S. Vaidya 1239

Architectural specification for massively parallel computers: an experience and measurement-based approach
R. Brightwell, W. Camp, B. Cole, E. DeBenedictis, R. Leland, J. Tomkins and A. B. Maccabe 1271

Practical performance portability in the Parallel Ocean Program (POP)
P. W. Jones, P. H. Worley, Y. Yoshida, J. B. White III and J. Levesque 1317

HPCx: towards capability computing
M. Ashworth, I. J. Bush, M. F. Guest, A. G. Sunderland, S. Booth, J. Hein, L. Smith, K. Stratford and A. Curioni 1329

Volume 17 Number 11 September 2005

Special Issue
High-Performance Computing in Geosciences

Editorial
M. Peszyńska and M. F. Wheeler 1363

Full waveform seismic inversion using a distributed system of computers
I. G. Roy, M. K. Sen and C. Torres-Verdin 1365

Enabling interactive and collaborative oil reservoir simulations on the Grid
M. Parashar, R. Muralidhar, W. Lee, D. Arnold, J. Dongarra and M. Wheeler 1387

Large-scale density-driven flow simulations using parallel unstructured Grid adaptation and local multigrid methods
S. Lang and G. Wittum 1415

A simulation and data analysis system for large-scale, data-driven oil reservoir simulation studies
T. Kurc, U. Catalyurek, X. Zhang, J. Saltz, R. Martino, M. Wheeler, M. Peszyńska, A. Sussman, C. Hansen, M. Sen, R. Seifoullaev, P. Stoffa, C. Torres-Verdin and M. Parashar 1441

Volume 17 Number 12 October 2005

Special Issue
Foundations of Middleware Technologies

Editorial
P. Narasimhan 1469

On the modelling of publish/subscribe communication systems
R. Baldoni, R. Beraldi, S. Tucci Piergiovanni and A. Virgillito 1471

Distributed filter processes
R. K. Joshi 1497

Benchmarking message-oriented middleware: TIB/RV versus SonicMQ
P. Maheshwari and M. Pang 1507

MEAD: support for Real-Time Fault-Tolerant CORBA
P. Narasimhan, T. A. Dumitraş, A. M. Paulos, S. M. Pertet, C. F. Reverte, J. G. Slember and D. Srivastava 1527

Volume 17 Number 13 November 2005

Lightweight monitoring of MPI programs in real time
G. Florez, Z. Liu, S. M. Bridges, A. Skjellum and R. B. Vaughn 1547

A static mapping heuristics to map parallel applications to heterogeneous computing systems
R. Baraglia, R. Ferrini and P. Ritrovato 1579

GridBLAST: a Globus-based high-throughput implementation of BLAST in a Grid computing framework
A. Krishnan 1607

Volume 17 Number 14 10 December 2005

Special Issue
Third IEEE International Workshop on High Performance Computational Biology (HiCOMB 2004)

Editorial
D. Marinescu 1625

Study of a highly accurate and fast protein–ligand docking method based on molecular dynamics
M. Taufer, M. Crowley, D. J. Price, A. A. Chien and C. L. Brooks III 1627

Parallel protein folding with STAPL
S. Thomas, G. Tanase, L. K. Dale, J. M. Moreira, L. Rauchwerger and N. M. Amato .. 1643

Dynamic programming for LR-PCR segmentation of bacterium genomes
R. Andonov, D. Lavenier, P. Veber and N. Yanev 1657

Parallel RNA secondary structure prediction using stochastic context-free grammars
T. Liu and B. Schmidt 1669

Peptide identification via constrained multi-objective optimization: Pareto-based genetic algorithms
J. M. Malard, A. Heredia-Langner, W. R. Cannon, R. Mooney and D. J. Baxter 1687

RAxML-II: a program for sequential, parallel and distributed inference of large phylogenetic trees
A. Stamatakis, T. Ludwig and H. Meier 1705

Volume 17 Number 15 25 December 2005

Loosely coordinated coscheduling in the context of other approaches for dynamic job scheduling: a survey
A. C. Sodan 1725

Neuroscience instrumentation and distributed analysis of brain activity data: a case for eScience on global Grids
R. Buyya, S. Date, Y. Mizuno-Matsumoto, S. Venugopal and D. Abramson 1783

Middleware benchmarking: approaches, results, experiences
P. Brebner, E. Cecchet, J. Marguerite, P. Tůma, O. Ciuhandu, B. Dufour, L. Eeckhout, S. Frénot, A. S. Krishna, J. Murphy and C. Verbrugge 1799
